

PROJECT

CEE 530: Continuum Mechanics and Thermodynamics

Due: April 2nd & May 2nd, 2018

The final project consists in a review, and possibly an extension, of a paper of your choice that requires advanced knowledge of continuum mechanics.

- Due Monday April 2nd Project proposal - a half page abstract containing the bibliographic information (title, authors, doi, etc.) and a motivation for the choice of the paper
- Due Wednesday May 2nd Project report and presentation - a 15min presentation to be given to your class mates and a four page paper (single spaced, 1in margin) on the paper that goes beyond simply summarizing. Critiquing and possible extension of the theory should be a core part of your project.
